

SUMMARY

Computer Science undergraduate with strong expertise in AI/ML, specializing in computer vision, image forensics, and real-time AI systems. Experienced in building and deploying scalable machine learning pipelines for identity verification and automation.

EDUCATION

Year	Degree/Certificate	Institute	CGPA/Percentage
2022–2026	B.Tech – CSE (Big Data Analytics)	SRM Institute of Science and Technology, Chennai	9.72/10
2021–2022	CBSE (XII), PCM with CS	Delhi Public School, Greater Noida	91.8%
2019–2020	CBSE (X)	Delhi Public School, Greater Noida	96%

INTERNSHIP

- Authenta.ai

Research & Development Engineer (AI/ML) Intern

Chennai, Tamil Nadu

Feb 2026 – May 2026

–

Researched and benchmarked state-of-the-art image forgery detection models, including CAT-Net V1/V2, DeepID, DetectionSAM, and ForensicSAM, for localization of copy-move, splicing, and AI-generated manipulations.

–

Selected and fine-tuned ForensicSAM on a custom dataset of 162K training and 40K validation images using Lambda Labs GPU infrastructure.

–

Tracked experiments with MLflow, deployed the Dockerized inference pipeline to the company development server, and integrated a face embedding inference module into the internal SDK with REST API validation using Postman.
- Inadev Pvt. Ltd.

AI/ML Intern

Noida, Uttar Pradesh

Jun 2025 – Aug 2025

–

Video KYC System: Developed an AI-driven Video KYC system with document classification, face matching, liveness detection, and voice-based questionnaires using OCR, DeepFace, MediaPipe and Vosk ASR.

–

Smart Video-to-Text Summarizer: Built an AI video understanding system that generates captions, detects objects, and summarizes content using YOLOv8, BLIP-2 and T5 with TTS narration.

PROJECTS

- QuantEdge Investment Advisor

— Built an intelligent portfolio recommendation system using LLMs, optimization models, and live market data with a Streamlit dashboard for analytics.

SteelSight Defect Intelligence

— Developed a U-Net-based computer vision system for steel surface defect segmentation with FastAPI deployment and optimized real-time inference.

InterviewCopilot AI

— Built a real-time mock interview platform that generates role-specific questions, evaluates spoken responses using LLMs, and provides feedback on technical accuracy, communication, and confidence.

TECHNICAL SKILLS

- Programming:

Python, SQL, C/C++, Java

Frameworks & Libraries:

PyTorch, TensorFlow, scikit-learn, OpenCV, Hugging Face Transformers, YOLOv8, DeepFace, MediaPipe, Streamlit, Flask, FastAPI

Tools & Technologies:

Git/GitHub, Docker, MLflow, MongoDB, MySQL, Postman, Linux, Lambda Labs, Power BI, Tableau

Domains:

Computer Vision, Image Forensics, Deep Learning, NLP/LLMs, Multimodal AI, Retrieval-Augmented Generation (RAG),AI/ML Automation, Big Data, Cloud Computing

CERTIFICATIONS

- NPTEL

— Programming in Java; Cloud Computing; Data Science for Engineers

Oracle Certified Foundations Associate; Fortinet Certified Associate in Cybersecurity

MATLAB

— Machine Learning, Deep Learning, Image Processing Onramp

ACHIEVEMENTS

- Performance-Based Scholarship

— SRM Institute of Science and Technology

Smart India Hackathon

— Top 30 teams

POSITIONS OF RESPONSIBILITY

- Sponsorship Associate, Coding Ninjas Club

2023 – 2024

– Managed sponsorship outreach and collaborations to secure funding and support for events.

Research Associate, Data Science Club

2023 – 2024

– Contributed to literature reviews and applied data science techniques to real-world problems.
